

# Calendar Project Sheet

Calendars are so quick & easy to make.  
If you want to cover the Calendar with a Backing Paper you will need to first colour the bottom 2 cm with felt pen \* THIS IS IMPORTANT otherwise you will not be able to push the feet on!

....also colour Both Sides of the Feet & allow to dry.

I use Double Sided sticky Sheets to attach the Paper or you could use glue. Stick the whole sheet to the paper. Make two small registration marks on the back of the Calendar blank 1.5cm from the bottom.. Put the paper face down & sticky side up. Place the calendar face down on the paper using the reg marks to line up the bottom this leaves the bottom free from paper and clear for the feet to be pushed on once complete.

Whilst still face down carefully trim with a sharp knife. Turn over and decorate. slide on feet & your done :-)

Desk Calendars make a great gift. Can be Personalized & are easily decorated with, felt pens, gelly pens, paints, inks, paper...
